Daily Assignment -1

192212111

- 1) Write a C program to print your name, college name and department using basic syntax and printf().

code

```
#include <stdio.h>
```

```
int main () {
```

```
printf ("name: [A. Jayanth] \n");
```

```
printf ("college name: [SIMATS] \n");
```

```
printf ("department name: [electronics and communication  
engineering] \n");
```

```
return 0;
```

```
}
```

logic:

1. declare character arrays to store name, college, and department.
2. use printf() with %s format specifies to print string variables
3. \n is used for newline.

output

name: [A. Jayanth]

college name: [SIMATS]

department name: [electronics and communication engineering]

main.c

Share

Run

Output

Clear

```
1 // Online C compiler to run C program online
2 #include <stdio.h>
3
4 int main() {
5     // Write C code here
6     printf("Name : [a jayanth]\n");
7     printf("college name :[SIMATS]\n ");
8     printf ("department name: [ Electronics and Communication
           Engineering]\n");
9
10    return 0;
11 }
```

```
Name : [a jayanth]
college name :[SIMATS]
department name: [ Electronics and Communication Engineering]
```

```
